HEPP HOSPITALA: SYSTEM SERVICE UTENSILS OF THE HIGHEST QUALITY

As well as being extremely durable and compact, HEPP HOSPITALA system cooling service utensils have tremendous cooling capability that makes them perfect for the job of keeping food chilled. The system service utensils help to ensure that cold food and side dishes are kept cool for up to 7 hours or longer and can be served at just the right temperature. Smart design solutions such as the stacking protrusions and the functional shape of the stacking rims offer great practical benefits every day when the system service utensils are stacked for drying or pre-service refrigeration.

HEPP HOSPITALA offers its customers:

- Many years of experience by tradition
- Ground-breaking innovations
- Cutting-edge technologies & traditional craft skills
- Dependability & after-buy warranty
- Direct contacts in-house & close cooperation
- Competent consulting service & project work
- Individual solutions for any set of requirements
- Optimisation of process flows
- Flexible production & product development
- Field testing
- Controlled production flows & certified quality management
- Large-volume production capacity
- Access to products manufactured by other HEPP business units

HEPP HOSPITALA products impress with:

- Outstanding quality and durability
- High-grade materials & workmanship
- Elegant & ergonomic design
- Totally easy handling & superb functionality
- Cost-effectiveness
- Compliance with the most stringent hygiene requirements
- Customisability
- Wide range of colours

Care recommendations:

- The cooling elements should be placed in the deep freezer to cool when dry and at room temperature.
- Unused cooling elements from each service should be removed from cold storage to prevent the elements from over-freezing. It is possible for increased condensation to form on the tray or cloche and cold meals could then be stored in temperatures under 10 °C.
- For cold cuts or other cold side dishes, the plate and tray should be cooled overnight. However, the temperature of the upper part should not be less than +8 °C.

Stacking options:

- For storage we recommend a reinforced slotted platform stacker.
- Depending on the amount to be stored, the 60 x 60 cm (23.62 x 23.62 in.) stacker (for 4 columns) or the 85 x 60 cm (33.46 x 23.62 in.) (for 6 columns) can be used.

Suggested Stackers:

- Hupfer Model BD/60-60 K-Standard
- BLANCO Model CEK 58/58 or Standard recommended stackers in special design.

Suggested Stackers in special version

Cooling cover, round Item-No. 41.8047

Square cooling covers

Thermoplastic, for porcelain bowls of up to 11.6 x 11.6 cm (4½ x 4½ in.)

Cooling cover, square Item-No. 41.8048

Cooling cloche **VARIOFRESH**

- The optimum level of cold temperature retention which uses only one component.
- Perfect for hygienic covering and cooling of all cold meals for breakfast, lunch and dinner.
- Robust polypropylene with a cooling core in the lid with foam-lined sides to cool food to the perfect temperature.
- No system base part, so the eating height is conveniently low, very much like at home.
- 6 large stacking points for optimal cooling, stacking and drying.
- The lid lifts easily thanks to a handy gripping edge.
- The matt surface structure ensures that condensation does not drip onto the food but instead remains on the inside of the lid in small droplets.
- Deep gripping overlap which ensures a secure hold on the plate and which will withstand even the most difficult of journeys.
- Easy handling when laying out food and when cleaning thanks to an elegant, functional design and high-quality finish.
- For plates of up to 26 cm (10¼ in.) and bowls up to 19.4 cm (7¾ in.) in diameter.
- Available in various colour combinations.

VARIOCOOL with insulating cover

- This optimal cold temperature retention system is perfect for bringing the ideal evening meal of cold cuts (such as meats and cheeses) to patients, hospital residents or retirement homes at the perfect temperature.
- Also ideal for optimal cooling of salad dishes, which can be placed between hot dishes for a lunch time meal on a tray trolley without any concern for temperature.
- Excellent cooling properties of the cooling base part on account of the very large cold capacity.
- Insulating cover double-walled, insulated, homogeneously welded with reinforced foam core.
- Aesthetic presentation of meals thanks to flat construction of the cooling lower.
- The cover can be easily manipulated thanks to a gripping strip that runs all the way round.
- Perfect fit for all standard plates up to 26 cm (10¼ in.) in diameter and bowls up to 19.4 cm (7¾ in.) in diameter.
- The high-quality finish ensures durability and an attractive look.
- All components are dishwasher-safe and can be easily stacked to save space.

VARIOCOOL with plate cover

- Only two system parts are required for optimum temperature maintenance, also with single-walled, extra-thick plate covers.
- Tried and tested cold temperature retention over many hours thanks to a cooling base part made of plastic with a special cooling core. Ideal when serving evening-sized portions at HACCP standard temperatures.
- Aesthetic presentation of meals thanks to flat construction of the cooling lower.
- The cover can be easily manipulated thanks to a gripping strip that runs all the way round.
- Perfect fit for all standard plates up to 26 cm (10¼ in.) in diameter and bowls up to 19.4 cm (7¾ in.) in diameter.
- The high-quality finish ensures durability and an attractive look.
- All components are dishwasher-safe and can be easily stacked to save space.
- The aesthetic effect is further enhanced by choice of various attractive colours.
- Transparent plate covers give a clear view of the ready-to-serve dishes while keeping them covered at the same time.

INTERCOOL with cooling pellet

- The dishes are kept perfectly cool for early pre-evening portioning – for example with cooked meats and cheese – thanks to double-walled insulating plastic lids and base parts with cooling pellet.
- High execution of thermoplastic base part.
- Cooling pellet made of white plastic lined with a special cooling material, 19 cm (7½ in.) in diameter.
- The insulated, double-walled cover can be easily manipulated thanks to a gripping strip that runs all the way round.
- Perfect fit for all standard plates of up to 26 cm (10¼ in.) in diameter and bowls in all common sizes.
- The high-quality finish ensures durability and an attractive look.
- All components are dishwasher-safe and can be easily stacked to save space.

Cooling covers – for side dishes and desserts

- Practical system extension for all mealtimes.
- Optimal, long-lasting cooling for side dishes such as salads, desserts, stewed fruit or cereals.
- Extra-high walls for more cooling capacity and usable space (e.g. mixed green salads or visually appealing presentation of desserts or sweets).
- Stacking points to enable drying after rinsing and for optimum deep-freezing.
- Made of polypropylene. Extra-thick material, so the product is very robust and durable.
- Round execution, porcelain bowls of up to 123 mm (4¾ in.) in diameter will fit.
- Square execution, porcelain bowls of up to 116 x 116 mm (4½ x 4½ in.) will fit.
- System designed with perfect proportions to fit accurately with all items.
- The cooling covers are dishwasher-safe and can be easily stacked to save space.
